## **DETAILED ACTION**

### ***Response to Amendment***

This is in response to applicant's amendment filed on 11/21/2005

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sally J. Brown on 02/03/2006.

The title is changed to "Range discriminating optical sensor having a wide angle lens with a fixed focal length".

### ***Allowable Subject Matter***

Claims 1-32 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose a depth discriminating sensor for a vehicle safety device, among other features, comprising: a wide angle lens having an aperture having an f-stop number and having a fixed focal length; an electronic imaging element having a pixel size and/or a selected pixel size; the f-stop number and the pixel size jointly selected to create a rear depth of field in the range from about 0.1m to about 3m; and a

signal processor configured to discriminate between objects in the depth of field and out of the depth of field based on image sharpness and blur.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
